KEY QUALIFICATIONS

Cooperation strategy processes: Mr Drakenberg has contributed with expert advice in numerous cooperation strategy processes at Sida, typically starting with providing analytical input in the form of environment and climate change policy briefs and later discussing and commenting on assessments or draft strategies. In some recent cases it has included participation during the initial assessment, the start-up meeting, the actor meeting, by providing thematic input to the country teams and substantial dialogue with the country teams, including a commitment to provide expert advice during the implementation in specific areas.

Capacity development and training on environment: Close to 20 years of professional experiences from working with building capacity for environmental mainstreaming in large organisations. Mr Drakenberg has led the development of pedagogical materials, e-learning tools, workshops and doing training and coaching for Sida, the private sector and academia. He is a frequent lecturer/speaker/moderator and is well informed on how other bilaterals and multilaterals are addressing these issues.

Integrating climate change adaptation in development cooperation: Mr Drakenberg has worked closely with Sida on developing guidance on how best to address climate change adaptation in Sida's work and analytical tools. He has supported Sida in international processes on the subject and has expertise in climate finance.

Harmonization of development cooperation methods and approaches: The aid effectiveness agenda calls for harmonized approaches and impacts on Sida's way of working. As expert, Mr. Drakenberg has assisted Sida in more than 10 OECD DAC/EPOC task teams and international meetings and contributed to the dialogue and in writing to development of guidance documents for international development cooperation. Integration of environment in budget support processes is one such example.

Country economic analytical work: The economic and distributional impacts of environmental degradation and climate change are seldom well described and communicated to policy makers.

Economic arguments carry substantial weight and Mr Drakenberg has specialized in identifying how environmental valuation techniques, natural resources accounting and existing economic information better can be used to inform decision making at country level, including national planning processes.

SELECTED ASSIGNMENTS RELEVANT TO THIS ASSIGNMENT

June 2005 – Oct. 2010, Policy analyst EEU - Support and advice to Sida in mainstreaming environment and climate change in cooperation strategies (Sweden/global): Analysing and communicating key environmental and climate change issues, their linkages to poverty reduction and economic growth, and the institutional capacity to manage these issues. The analysis is based on environmental economics expertise. Currently, they typically cover risks and opportunities related to ecosystem services, climate change, disaster risk reduction and natural resources management, and the linkages to poverty, health, human rights, institutional capacity, governance and pro poor economic growth. Support may also involve commenting on Joint Assistance Strategies or PRSPs. *Country strategy processes:* Afghanistan, Bangladesh, Belarus, Burkina, Faso, Guatemala, India, Kenya, Lake Victoria, Liberia, Mali, Moldova, Mozambique, Rwanda, Uganda, Ukraine, Zambia ; and *regional strategy processes:* Middle East and Northern Africa region.

March 2010-October 2010, Policy analyst EEU, Support to Sida country teams (Mali/Burkina Faso, Sweden): Mr Drakenberg has worked in close cooperation with the country teams in Mali and Burkina Faso country teams in the development of the assessment memo. The work included commenting and dialogue on assessment memos participation in the startup meetings in Bamako/Ouagadougou, several further contacts during the preparation of the strategy. In the case of Mali it also included a special report on Mining in relation to the Swedish strategy.

October 2005-October 2010, Policy analyst EEU, Advice to Sida related to budget support, budget analysis and public financial management (Sweden/global): On numerous occasions Mr Drakenberg has supported Sida in finding ways to integrate environment in these topics, including:

- Discussing with Sida the EU Green paper on Budget support* (October 2010)
- Assisting Sida in commenting on OECD guidance on integration of environment and climate change in budget analysis* (August 2010)
- Advice to Sida related to the integration of environment and climate change in budget analysis* (October 2009)
- Advice related to the assessment memo for Swedish budget support to Mali* (September 2008, March 2007), Burkina (September 2008, Nov 2006), Mozambique (March 2007)
- *Member of an ad-hoc Poverty Environment Partnership (PEP) working group on integration of environment in budget support* involving dialogues and workshops with other bilaterals, commenting on draft ToR for consultancy and discussions with several policy teams at Sida (2005-2006)
- Advice related to integration of environment and in Sida Guidelines for Budget support* (August 2006)
- Advising on integration of environment during the process of developing Sida's Handbook on Public Financial Management* and related areas. (October 2005)

March 2008-October 2010, Policy Analyst EEU - Advise to Sida related to climate change and in particular climate change adaptation (Sweden/global): Mr Drakenberg has been advisor to Sida's climate change specialists and been an active member of the OECD DAC EPOC Task team on Climate change adaptation. The work has included preparations for task team meetings, participation at several international meetings, discussions on future work of the task team, written contributions to the OECD Policy Guidance on Integrating climate change adaptation in development cooperation.

- Assisted Sida in the *development of a Guidance Note on Climate change* with the aim to help inform Sida staff on how best to integrate climate change in Sida's operations (May-October 2009).
- Lead author and expert advisor to Sida on the role of development cooperation and new financing mechanisms,; As input for the preparation of a new Swedish strategy for Environment and Climate Change Mr Drakenberg, together with Ms César prepared a report "*Old, new and future financing for environment and climate change - Assessing the role of development cooperation agencies*". Sida used the report during a side event at COP 15 and it was presented and discussed at a seminar with the director general at Sida in January 2010.

-In cooperation with the Environment and Climate change Team at Sida, Mr Drakenberg undertook an assessment of *how environment and climate change could be integrated in Sida's methods* for Integrated Economic Analysis including a country case study and several interactions with the Methods and policy team at Sida (September 2007-March 2009).

-Expert advice to Sida relating to the preparation of a new Strategy "*Strategic Framework on Climate change and development for the World Bank*". The work was informed by consultations with World Resources Institute (May 2008).

June 2006-August 2010, Policy Analyst EEU, Support to capacity development at Sida (Sweden, global). The last four years have included a range of activities and support to Sida in the area of capacity development:

-*Development of a training module on environment and climate change*: In close cooperation with Sida and the Helpdesk for Environmental Assessment, Mr Drakenberg designed and wrote the script for a flexible training package for Sida involving presentations, exercises and videoclips (March 2010-August 2010).

-*Mapping study on environment and climate change capacity development*. Mr Drakenberg was the lead author for a Sida review of ongoing capacity development activities on environment and climate change among bilateral and multilateral donor agencies. The report informed Sida's capacity development activities and contributed to increased harmonization. (January 2009-March 2009)

- *Support to the design, preparation and implementation of workshops* on environment and climate change integration for the country teams in Bamako and Ouagadougou. Mr Drakenberg also acted as moderator for the workshops in both English and French. The program included individual coaching sessions for head of cooperation, budget support specialist etc. (January-March, 2009)

-*Support to Sida in a developing a tool for "dialogue on environment"*. The work included interviews with dialogue specialists at Sida Stockholm and Nairobi, literature review, meetings with Sida's method team and Sida's experts on gender and conflict and human rights.

-Mr Drakenberg was the lead author and project manager for the *development of an e-learning training package for Sida staff*. The work included close cooperation with Sida staff and the Helpdesk for Environmental Assessment. (2006-2007)

-*Speaker in various training sessions, seminars at Sida* on green growth, environmental integration in country strategies, climate finance etc. (2006-2010)
