KEY QUALIFICATIONS

Environmental (and climate change) integration: Five years of experience in giving advice to Sida officers related to *integration of environment and climate change into development cooperation*, for instance through analysing and communicating key environmental and climate change issues and their linkages to poverty reduction and development.

Environmental economics advice: Good knowledge and understanding of environmental economics, especially in a developing country context. Three years of experience in giving advice to Sida officers related to environmental economics through various assignments such as writing reports and commenting on existing reports.

Cooperation strategy processes: Expert advice in cooperation strategy processes (including long-term development countries, European countries, actor driven cooperation countries and conflict/post-conflict countries) at Sida, by providing analytical input in the form of environment and climate change policy briefs. Support has also been given to the adhering results matrices.

Results monitoring and indicators: In-depth understanding of results monitoring and identification of (environment and climate change) indicators in the development cooperation strategy processes. Support to Sida's methodological development of results based management and environmental and climate change indicators.

Capacity Development: Experience from capacity development, including planning and coordination of environment and climate change workshops and seminars for Sida staff as well as individual coaching of Sida officers and country teams.

Skills in background research and analysis: Results-driven background and analysis skills applied on a day-to-day basis in various assignments. Examples include both in-depth studies and short reviews.

Dialogue and communication skills: Excellent dialogue and communication skills acquired through various activities and assignments. From training experience, representation in various boards, to a wide network of people at Universities, NGOs and other organisations.
